A10.1 CULTURAL HERITAGE WALKOVER SURVEY

Introduction

A10.1.1 As part of the baseline study for the Environmental Impact Assessment undertaken in support of the application for the Scawd Law Wind Farm a walkover inspection of the area of the proposed development was undertaken. The area of the survey included the area of all the proposed elements of infrastructure, including the proposed access track. The survey was undertaken on 20th May 2021. The weather was overcast to wet. Where previously unrecorded assets were observed, these were described, photographed and their location recorded with a hand held GPS (Garmin ETrex 10).

Walkover Survey Results

A10.1.2 Windlestraw Law: possible former peat cutting. This is an area of approximately 5 m x 2 m, 0.4 m at it's deepest point. This asset is assigned number 55 in the gazetteer. The grid reference for the centre point of the cutting area is 337037, 642939.

Figure A10.2.1 Potential former peat cutting, facing south-east

A10.1.3 Windlestraw Law: cairn. The cairn is of steeply sided conical form , approximately 1 m high, and 3 m across. It is surrounded by a low stony bank approximately 5m in diameter, with the bank approximately 0.2-0.3 m high. The size and form suggests a possible clearance cairn It is possible that the cairn material is derived from the collapsed/demolished remains of dry stone enclosure or sheepfold. This asset is assigned number 56 in the gazetteer. The grid reference for the centre point of the cutting area is 336332, 642083.

Figure A10.2.2 Clearance cairn with possible enclosure/sheepfold, facing north-west

A10.1.4 Glede Know: cairn/sheepfold . Possible remains of a sheep enclosure, with possible cairn/tumbled wall material at north-eastern end. Possible cairn approximately 1.5 m x 3 m. Area of enclosure approximately 7 m x 10 m. Stones are scattered within the enclosure area. This asset is assigned number 57 in the gazetteer. The grid reference of the centre of the enclosure is 344844, 641483.

Figure A10.2.3 Enclosure/sheepfold with possible cairn, facing north-west

A10.1.5 No further previously unrecorded assets were observed during the walkover survey. None of the already known heritage assets recorded in the HER or NHRE lay in close proximity to the designed infrastructure of the proposed development.

A10.1.6 The locations of the heritage assets recorded in the walkover survey will be submitted to the Scottish Borders Council HER as shapefiles, together with uncompressed digital photographs of the assets.
